

## PUS10 rabbit pAb antibody

| Catalog No :          | Source:   | Concentration : | Mol.Wt. (kD): |
|-----------------------|---|-----------------|---------------|
| A20376                | Rabbit  | 1 mg/ml         | 58 kD         |
| Applications          | WB,ELISA  |                 |               |
| Reactivity            | Human,Rat,Mouse   |                 |               |
| Dilution              | WB 1:500-2000 ELISA 1:5000-20000  |                 |               |
| Storage               | -20°C/1 year  |                 |               |
| Specificity           | PURB Polyclonal Antibody detects endogenous levels of protein.  |                 |               |
| Source / Purification | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.   |                 |               |
| Immunogen             | Synthesized peptide derived from part region of human protein   |                 |               |
| Uniprot No            | Q96QR8  |                 |               |
| Alternative names     |   |                 |               |
| Form                  | Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.  |                 |               |
| Clonality             | Polyclonal  |                 |               |
| Isotype               |   |                 |               |
| Conjugation           |   |                 |               |
| Background            | purine rich element binding protein B(PURB) Homo sapiens This gene product is a sequence-specific, single-stranded DNA-binding protein. It binds preferentially to the single strand of the purine-rich element termed PUR, which is present at origins |                 |               |
| Other                 | Gene_name: PURB ; Protein_name: Transcriptional activator protein Pur-beta (Purine-rich element-binding protein B); Expression: Epithelium,Liver,Lung,  |                 |               |
