| A11104                | Rabbit                                                                                                                                                                                                                                                  | 1 mg/ml         | 18 kD         |
| Applications          | WB,IHC,IF,ELISA                                                                                                                                                                                                                                         |                 |               |
| Reactivity            | Human,Mouse,Rat                                                                                                                                                                                                                                         |                 |               |
| Dilution              | WB: 1/500 - 1/2000. IHC: 1/100 - 1/300. IF: 1/200 - 1/1000. ELISA: 1/10000. Not yet tested in other applications.                                                                                                                                       |                 |               |
| Storage               | -20°C/1 year                                                                                                                                                                                                                                            |                 |               |
| Specificity           | Phospho-Bad (S155) Polyclonal Antibody detects endogenous levels of Bad protein only when phosphorylated at S155.                                                                                                                                       |                 |               |
| Source / Purification | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.                                                                                                                                   |                 |               |
| Immunogen             | The antiserum was produced against synthesized peptide derived from human BAD around the phosphorylation site of Ser155. AA range:119-168                                                                                                               |                 |               |
| Uniprot No            | Q92934                                                                                                                                                                                                                                                  |                 |               |
| Alternative names     | BAD; BBC6; BCL2L8; Bcl2 antagonist of cell death; BAD; Bcl-2-binding component 6; Bcl-2-like protein 8; Bcl2-L-8; Bcl-XL/Bcl-2-associated death promoter                                                                                                |                 |               |
| Form                  | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.                                                                                                                                                                                 |                 |               |
| Clonality             | Polyclonal                                                                                                                                                                                                                                              |                 |               |
| Isotype               |                                                                                                                                                                                                                                                         |                 |               |
| Conjugation           |                                                                                                                                                                                                                                                         |                 |               |
| Background            | BCL2 associated agonist of cell death(BAD) Homo sapiens The protein encoded by this gene is a member of the BCL-2 family. BCL-2 family members are known to be regulators of programmed cell death. This protein positively regulates cell apoptosis by |                 |               |
